Internship

Full-Stack Developer (Intern)

FullCircle - San Francisco, CA (Remote) | *June 2025 - October 2025*

- Contributed as a frontend developer on Momentous Support Portal, a customer self-service platform.
- Designed reusable components (modals, action panels, dashboards) ensuring responsive performance.
- Implemented **Google OAuth** authentication and complex order/subscription management flows.
- Built **mobile-first dark UI** using React, TypeScript, Redux Toolkit, and Tailwind CSS.

EDUCATION

Bachelor of Technology (CSE - AI & ML)

Lakshmi Narain College of Technology, Bhopal (*Oct 2022 - June 2025*) | **CGPA: 7.77/10**

SKILLS

Programming Languages: Python, JavaScript, TypeScript

Web Development Technologies: HTML, CSS, React.js, Node.js, Express.js, MongoDB

Databases: SQL, MongoDB

Tools & Technologies: Git, GitHub, Tailwind CSS

Problem Solving: Data Structure & Algorithm Optimization (Intermediate-level proficiency in solving medium-difficulty coding problems, debugging complex issues, and optimizing system performance)

PROJECT

FullCircle Customer Experience Dashboard - Frontend Development ([Live](#))

Tech Stack: React, TypeScript, Redux Toolkit, Context API, Tailwind CSS, Vite, Google OAuth, DigitalOcean

- Built the **frontend interface for FullCircle CX**, a platform streamlining subscriptions, orders, and customer interactions.
- Designed **reusable UI components** (dashboards, panels, modals) with **mobile-first responsive design**.
- Implemented **interactive features** and integrated **APIs for real-time data display**.
- Developed **dark-themed UI** following brand guidelines using **React, TypeScript, Redux Toolkit, and Tailwind CSS**.

Momentous Support - Customer Self-Service Portal ([Live](#))

Tech Stack: React, TypeScript, Redux Toolkit, Context API, Tailwind CSS, Vite, Google OAuth, DigitalOcean

- Developed a **mobile-first, dark-themed customer support portal** with responsive UI and brand-consistent design.
- Implemented **multi-step authentication** (Google OAuth + email/password) with session persistence.
- Built **advanced order & subscription management**: multi-select actions, modals for cancellations/refunds, status tracking, and success animations.
- Managed complex UI states using **Redux Toolkit** and authentication state via **Context API**.

LiveDocs (Real-Time Documentation App) ([Live](#)) | [GitHub](#)

Tech Stack: Next.js, TypeScript, Tailwind CSS, React, Web APIs, Clerk Authentication

- Developed a real-time documentation platform enabling collaborative editing and secure multi-auth login (email, Google, others).
- Integrated smooth animations and a responsive UI using Tailwind CSS.
